mower*

**DAVID**  
SMART FARMING SOLUTIONS

SERIE

# LAT&GO

**Between-rows string mower.** Perfect to mulch the weeds between the rows. Suitable for vineyards, fruit trees and olive groves.

Proportional solenoid valve kit for RPM adjustment from the cab.

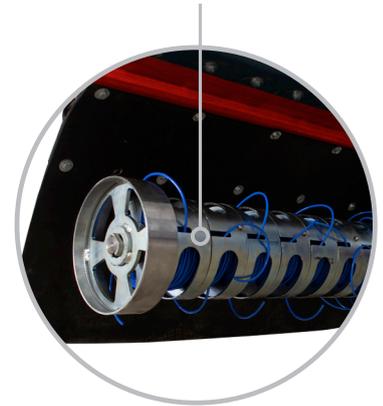

3PH adjustable and tilting.

Adjustable carter with rubber protector.

Hydraulic extension.

Protective skid.

Fast spool change without tools.

MODEL IN IMAGINE:  
LT-S

## Versatility

- The ID-CONTROL joystick allows to control all the machines manufactured by ID David and equipped with the ID-PLUS or ID-MICRO technology.
- For a perfect job in any type of soil and/or weeds.

## Exclusivity

- Innovative rotor that incorporates independent spools of 40 m of nylon string, easy to extract and extend manually without the use of tools.
- Possibility of varying the rotation speed of the rotors from the joystick, either to increase the mulching power or to decrease it, to avoid damage to young plants.

## Effectiveness

- Time is money. On standard soil conditions it is possible to work at high working speeds without damaging the plants.
- Electro-hydraulic system designed for simple and intuitive handling thanks to its integrated automation.

## Reliability

- Components and raw materials of high quality and certified suppliers.
- Low maintenance. Incorporating anti-friction bushings to eliminate grease fittings in the joints.

## Safety

- Retractable heads adjustable in sensitivity with anti-shock protections.
- Soil is perfect copied, thanks to the tilting frame and the independent electro-hydraulic height adjustment of the pneumatic wheels.

## Sustainability

- Ecological alternative to the use of herbicides.
- The low power required allows the use of small tractors with a lower carbon footprint.
- Sustainable consumption: Equipment designed to be up-to-date and have a long service life.

## Standard Equipment

- Includes a PRO hydraulic unit with cooler and double pump.
- ID-PLUS DUAL (multifunction joystick).
- Independent drive of mowers.
- Electrohydraulic extension.
- Wheels with independent electro-hydraulic height adjustment.
- Electro-hydraulic adjustment for rotor tilt and transport position.
- Mechanical sensor adjustable on sensitivity.
- Mower rotor with 12 spools and skid.
- Protector casing adjustable in height and angle of inclination.
- Bushings in all joints.
- 3pH with tilting system.

## Remote control type

### ID-PLUS DUAL

- Includes ID-CONTROL multifunction joystick.
- It includes ON/OFF right engine.
- It includes ON/OFF left engine.
- Includes an electronic microcontroller: allows software updates at any time.
- Includes a modular electro-hydraulic system: it allows to increase the number of electro-hydraulic functions.

### ID-MICRO DUAL

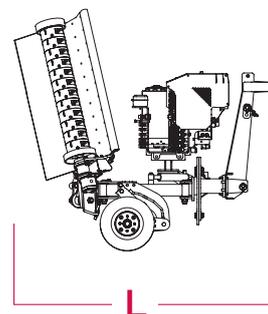

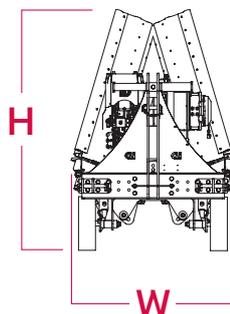

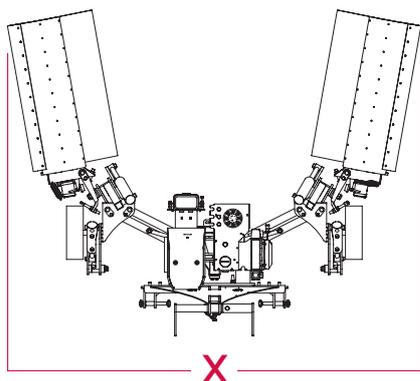

- ! NOT included the ID-CONTROL multifunction joystick.
- Only for customers who already have the ID-CONTROL multifunction joystick.
- It includes ON/OFF right engine.
- It includes ON/OFF left engine.
- Includes an electronic microcontroller: allows software updates at any time.
- Includes a modular electro-hydraulic system: it allows to increase the number of electro-hydraulic functions.

## Accessories and Options

	DESCRIPTION	OBSERVATIONS	REF.
	RPM meter for grass trimmer heads	Electronic control of the RPM of the grass trimmer	IW-RPM
	30 mt wire spool	Patented	CHP-01
	Packaging	Basic	EMB-1
		Airfreight- oceanfreight	EMB-3

## Ideal products and services that inspire trust, quality, experience and excellence

Specialized and customized agricultural machines with an attractive design and increasing digitalizations. Our products are oriented towards a biological, environment-friendly and precision farming.
