ID-CONTROL

The multifunction joystick allows both to electronically manage and control all ID DAVID machines equipped with our smart control system: ID-PLUS or ID-MICRO. It is the most complete and flexible electronic control tool on the market.

Effectiveness

- Branch integrated in our Technical Office exclusively dedicated to the development of programming and software integration.
- Design criteria focused on the performance and potential of hydraulic movements.

Sustainability

- Equipment designed to last for many years. We are reinventing the four R's for environment, guaranteeing a long lifespan to all our equipment thanks to a modular ecodesign.

Reliability

- Superior quality components and certified suppliers.
- Strong equipment inspired by heavy machinery used in civil and mining works for the toughest and most extreme jobs.

Versatility

- A single joystick to manage over 30 different ID machines.

Exclusivity

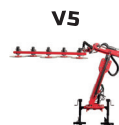

- Plug & Play. The buttons auto-configure themselves differently by connecting the same joystick to different ID DAVID machines, offering an intuitive combination of functions/buttons.
- We program and manage a fully tested and high quality software library that allows both to reduce development time and to exchange solutions between programs to facilitate customization.

Safety

- Safe operations thanks to automatic mechanisms that protect and extend the useful life of all components.
- Safe designs according to CE regulations for agricultural machinery.

Smart control system: ID-PLUS

Our exclusive solutions development to control any ID equipment having electrohydraulic functions. ID-CONTROL can control any ID machine mounting an ID-MICRO microcontroller.

+Easy to use.

+Reliability.

+Comfort.

+Robustness.

+Functional safety.

+Response speed.

+Optimal performance.

+Flexible and upgradeable.

A modular and stackable electro-hydraulic system to add at any time, new hydraulic function, providing smart control. A total flexibility by updating the software when needed.

ID PLUS software
updater kit

Imagine it'd be possible to get key data about the machine!

Track your equipment ID with our future mobile application is our challenge:

- Manage fleets and locations.
- Perform a diagnosis.
- Receive preventive maintenance alerts.
- Save to the cloud any key data about areas and working operations.
- Work out in the management software the results obtained.
- And many other things to discover...
